Profile

Creative and passionate Software Engineer, specialized in the design and development of digital innovations. Seeking to broaden my skills, I focus on creating robust, scalable, and high-performance solutions for businesses.

Skills

- Typescript
- Javascript
- Databases
- Tailwind css
- Git
- Docker
- Node Js
- React JS
- Next JS
- PHP

Languages

English
French
Arabic

Projects

AI-powered gym management system integrated with computer vision:

The system helps gym owners monitor and manage all aspects of their facility, ensuring transparency and accountability even in their absence.

Environnement and technologies : JavaScript, Python, PHP, TailwindCSS, HTML, SQL Server, face_recognition, OpenCV, VS Code, déploiement on DigitalOcean.

Remote feeding system for your pet:

The system allows you to feed your pet remotely through a web application, managing feeding schedules and food quantities.

Environnement and technologies : React.js, C++ , and I'ESP32, Arduino IDE, VS Code.

Multi-agency car rental application:

The application simplifies vehicle booking by allowing users to check availability, compare prices, and make real-time reservations across multiple agencies.

Environnement and technologies : PHP, Tailwind CSS, JavaScript, HTML, and database MySQL, VS Code.

Stock management application for the Urban Agency of Agadir:

The application simplifies stock management at the Urban Agency of Agadir by allowing the submission of material requests and the generation of detailed inventory reports by department.

Environnement and technologies : React.js, Tailwind CSS, Express.js, SQL Server, VS Code.

Aurax music streaming platform:

Aurax allows musicians to perform live from home and share their performances with a global community, making live music accessible to everyone.

Environnement and technologies : Typescript, React js, Express js, Vs code, with deployment on DigitalOcean.
